

ROBOT MAG WELDING CELL

>>THE TASK...

MAG welding of heat exchangers for truck auxiliary heating

AGRICULTURE/INDUSTRIAL VEHICLES

...OUR SOLUTION AT A GLANCE<<

ROBOT MAG WELDING CELLS

A handling robot with special gripper travels a number of stations, picks up a clamping unit with workpiece and welds it under a stationary welding torch. Next, a wire spiral is welded on, then a floor piece, then there is a leakage test in a plunge basin, and finally 2 exhaust gas nozzles are welded on.
