

ROBOT WELDING PLANT WITH MINI GUN

>>THE TASK...

Welding of insulating jacket, exhaust gas systems

AUTOMOTIVE

...OUR SOLUTION AT A GLANCE<<

ROBOT WELDING PLANT WITH MINI GUNS

Insertion of exhaust gas line of components, as well as insulating split shells and mantles in a workpiece carrier, fixed to a robot

Travel to welding station, spot welding and push-spots at location.

Micro welding guns and push-spotters are fixed stationary in the welding station.

Advantage: simpler handling, fewer interfering edges in the workpiece holder
